To whom it may concern,

Primary School League

As per the rules, points were awarded in ascending order from last place (1 point) to first (38 points). In cases where points scored was even (for example a group where everyone got 4 out of 7, the whole group would get the points of the highest placed player in that group). The event was competitively contested with these young players playing their heart out. Well-done to everybody!

There was a minor non-banning violation of fair play, hence a few results were changed, and the teammates of that player were, as a team, prevented from scoring championship points off them by the defaults that succeeded the adjustment, however individually the points were allocated to them. It was a learning experience for the young player.

Overall, this didn't change the destiny of the 2021 Primary School Chess Championship, I must however caution all of our players: violations in National events could get a player banned for life as well as their whole region defaulted for the event. Buffalo City Chess has always been about honesty, integrity and commitment to both our games and our teammates.
